Password	changed Oct 30
Last sign-in	Today 09:40
Failed sign-ins	1 in 30 days

What Revoke now does

Removes the ZITADEL authorization, ends every session, revokes refresh tokens, deletes console sessions in Valkey and app passwords at the Doris proxy. Access tokens already issued stop working within 10 minutes.

Active sessions

End all sessions

Where	IP	Signed in	Method	
Chrome · macOS	10.4.2.18	Today 09:40	password + passkey	End

Roles

Every role is a project role in ZITADEL project stardata-platform. A person holds at most one level per component.

read-only here

Defined in Git (Terraform)

Role catalogue

Component	Role keys	Levels (low → high)	Token claim	What it allows	People per level
Platform	`platform.*`	owner · admin	`platform_roles`	Owner: everything, incl. Owners and Admins. Admin: members, apps, audit.	3 / 4
Doris	`doris.*`	viewer · analyst · engineer · admin	`doris_role`	SQL access via the Doris proxy; admin = backup, restore, nodes	2 / 5 / 6 / 2
Kafka	`kafka.*`	viewer · producer · engineer	`kafka_role`	Topics data.*, OAUTHBEARER	4 / 3 / 5
Memgraph / StarGraph	`memgraph.*`	viewer · engineer	`memgraph_role`	Bolt token; engineer can write	2 / 3
Flink	`flink.*`	viewer · engineer	`flink_role`	Flink UI through the gateway	1 / 4
SQLMesh	`sqlmesh.*`	engineer	`sqlmesh_role`	SQLMesh UI	3
ETL Studio	`etl.*`	viewer · developer · operator · admin	`etl_role`	Pipelines, CDC, document sources	2 / 6 / 2 / 1
MDM	`mdm.*`	viewer · steward · admin	`mdm_role`	Golden records, steward queue, rules	3 / 2 / 1
Monitoring	`monitoring.*`	viewer · operator	`monitoring_role`	Monitoring area, Grafana role	9 / 2

How a role reaches a service

1. Owner or Admin sets levels in Members → console backend creates or updates one ZITADEL authorization.
2. On the next token, ZITADEL calls the `stardata-claims` Action (preaccesstoken) which adds the short claims.
3. Each service reads its own claim: Doris proxy `doris_role`, Kafka `kafka_role`, Grafana `monitoring_role`…
4. Access tokens live 10 minutes, so changes reach every service within 10 minutes.

Sample access token (Priya Shah)

```
{
  "sub": "284019333120",
  "email": "priya@stardatadb.com",
  "doris_role": "analyst",
  "kafka_role": "viewer",
  "etl_role": "viewer",
  "mdm_role": "steward",
  "monitoring_role": "viewer",
  "platform_roles": [],
  "exp": 1793988000
}
